Badlapur West, Maharashtra, India

Professional Summary

Third-year B.Tech Computer Science student specializing in **Artificial Intelligence and Machine Learning** with hands-on experience building **full-stack web applications, REST APIs, interactive dashboards, and database-driven systems**. Skilled in **React, Python, FastAPI, SQL, MySQL, HTML, CSS, JavaScript, Git, and GitHub**, with experience in frontend development, backend logic, CRUD workflows, database integration, API integration, and AI/ML model integration. Built and deployed **GeneGuard, SupplyGuard, and Smart College ERP**. Experienced in AI-assisted development, debugging, rapid prototyping, teamwork, and application deployment through academic projects, freelance work, and **7+ national and 1 international hackathons**.

Education

Sanjivani University Maharashtra, India *B.Tech in Computer Science and Engineering – Artificial Intelligence and Machine Learning*
2024 – 2028

Technical Skills

Frontend: React, HTML5, CSS3, JavaScript, Responsive UI, Figma

Backend: Python, FastAPI, REST APIs, API Integration, Application Logic, Business Logic

Database: MySQL, SQL, Database Design, Data Modeling, CRUD Operations, Database Integration

Programming: Python, Java, C++, R, PHP

Development Tools: Git, GitHub, VS Code, AI-Assisted Development, Debugging, Rapid Prototyping

AI/ML: TensorFlow, OpenCV, Machine Learning, Model Integration, Prompt Engineering

Other: Power BI, UI/UX Design, Wireframing, Prototyping

Projects

GeneGuard – Genetic Data Security Platform | React, Python, FastAPI, AI/ML [Live Demo] **Deployed**

- Developed and deployed a **full-stack web application** for secure genetic data management and AI-powered analysis.
- Built an interactive **React frontend** for user input, genetic data visualization, analysis results, and application workflows.
- Integrated **FastAPI backend services** with AI/ML models to process user inputs and generate prediction results.
- Implemented application logic for **data processing, API communication, model integration, and result visualization**.
- Used **Git, GitHub, AI-assisted development, debugging, and rapid prototyping** throughout development and deployment.

SupplyGuard – Supply Chain Analytics Platform | React, Python, SQL, MySQL [Live Demo] **Deployed**

- Developed an interactive web application for analyzing **supply-chain risks, route performance, delays, and business impact**.
- Built user-driven workflows where route and operational inputs are processed to generate **dynamic risk and prediction results**.
- Implemented backend **data processing, feature engineering, business logic, risk calculations, and scenario analysis**.
- Used **SQL/MySQL** for structured data management and designed dashboards for KPIs, risk levels, delays, and route insights.
- Integrated machine-learning predictions into application workflows and connected prediction outputs with the user-facing interface.

Smart College ERP System | React, SQL, QR, Location Validation **Full-Stack Application**

- Collaborated on a **full-stack college ERP system** for academic and institutional management.
- Developed features for **QR-based attendance, scheduling, dashboards, automated reporting, and user workflows**.
- Implemented **business logic and SQL-based data workflows** for attendance validation, scheduling, and reporting.
- Built **location-based attendance validation** using dynamically refreshed QR codes every 15 seconds.
- Designed personalized dashboard functionality and collaborated with team members to understand requirements and resolve implementation issues.

Experience & Hackathons

Freelance Graphic & UI/UX Designer Remote *Freelance*
2023 – Present

- Designed **UI/UX interfaces, wireframes, prototypes, and application layouts** using Figma based on client and project requirements.
- Worked directly with clients to understand requirements, communicate solutions, incorporate feedback, and deliver customized designs.
- Created digital graphics, promotional assets, logos, and visual content while maintaining consistent layouts and visual identity.

Hackathons & Technical Competitions India *Participant / Developer*
2025 – 2026

- Participated in **7+ national and 1 international hackathons**, gaining hands-on experience in rapid prototyping, teamwork, problem solving, and application development.
- **Top 35 – SunHacK International 2025**, Sandip University, Nashik.
- Participated in **Smart India Hackathon 2026, DIPEX 2025, DIPEX 2026, and Eureka 2025**.
- Worked in collaborative teams to translate problem statements into functional prototypes under tight development timelines.

Certifications

- **IBM:** Python, R, IBM Watson, DevOps, SPSS
- **Great Learning:** Prompt Engineering, Data Science Foundation
